Cut EOB and Remittance processing cost by 80%!

EOBs are time consuming documents. The requirement of daily research can be made much more productive with our system. If you get 500 remittances a day with the STG/Laserfiche archiving system you can store all 500 remittances in about 15 minutes. And 20 years of **remittances/EOBs** will fit on a device smaller than this piece of paper that you are reading. Your research lookup per patient will now <u>take one minute or often much less</u>– and the best part is you don't have to leave your desk!

No more paper piling up everywhere. No more storage boxes or expensive library shelves. No more having to call the storage company for boxes. And the more importantly – No more lost documents!!

Great, but what does it cost?

For $8200 you can purchase the software, a 60 page/minute 6140z Fujitsu Color Scanner which scans single and dual sides on a single pass and fits in less than a one sq. ft. area on your desk. This price also includes two days of on-site professional training. Southern Technology Group has been helping clients with process improvements for 15 years. This is priced as a 3 user configuration, but of course there is no limit to the number of users you can purchase with this system.

When you calculate the cost of the system vs. the labor savings it is not difficult to come up with *a <u>3 month ROI!!</u>*

The Formula is Simple

+

+

The EOB/remittance system works on your existing desktop computer and it is likely that IT will not have to purchase any additional hardware other than possibly some disc space.

And that is not all! After you get your EOB/remittances under control this very powerful electronic content management system can tame the wilds of AP, AR, HR, compliance, purchasing, patient records and any other paper intensive departments of your organization. It can even integrate directly with your EMR system. The software comes complete with a very powerful workflow module and has additional automated capture, audit trail and web access modules.
